

WHAT IS THE REAL PRICE OF FREE TRADE?

Free trade agreements have been sold as the solution for increasing trade between countries and maximizing economic opportunities. However, the actual results show something entirely different.

Join Arthur R. Thompson as he discusses the real price of free trade and questions why current free trade agreement discussions are involving subjects outside of trade, including climate change, sustainable development, homeland security, the military and international courts.

Mr. Thompson is CEO of The John Birch Society, former owner of a manufacturing business, and author of "International Merger by Foreign Entanglements."
