

Our Mission

To teach the principles of a **Free Society** and **Free Enterprise** beginning with the Founders acknowledgement that men are by nature free and derive their natural rights from God, not government, that the proper role of good government is to protect the *inalienable rights* to "life, liberty and the pursuit of happiness", and that **Free Enterprise** is the right of the people to engage in a free and moral exchange of ideas, goods and services.

To that end we endeavor to help students identify these principles and to recognize the unintended consequences that occur when elected officials and citizens base priorities on *politics over principles*.

Our Objectives:

- Students will meet elected officials, business leaders & entrepreneurs. Take a personalized tour of the Executive, Legislative & Judicial Branches, including a tour of the Supreme Court, and learn the proper role of each.
- Students will be grounded in the Constitution and The Declaration of Independence with emphasis placed on the civic duty of every citizen toward the obligation of "eternal vigilance".
- Students will understand the difference between a *democracy and a republic and the significance of the Oath of Office
- Students will gain a rudimentary understanding of Free Enterprise including basic economic principles and private property rights.
- Students will have opportunities to speak to entrepreneurs and learn about:
 - ✓ What it takes to start a business - concept to reality.
 - ✓ Intellectual and financial investment and risk.
 - ✓ How Free Enterprise benefits a Free Society
 - ✓ Principles of sound money management
- Students will receive materials from the Liberty Library and a recommended reading list.
- Students will meet business people and public servants and learn about our MENTORSHIP PROGRAM.
- Students will learn about ethics, leadership, communication skills and *more*.

*Democracy is two wolves and a lamb voting on what to have for dinner. **Liberty** is a well-armed lamb contesting the vote
